

Minerals found in Maharashtra

MAHARASHTRA	Minerals Found in Respective Districts	Brief Summary and Important Links	
Ahmednagar	Limestone	Maharashtra is also the leading producer of graded fluorite, manganese and kyanite. The value of principal minerals in the state remained at Rs. 5917.29 crores and that of minor minerals at 317.32 crores. The state contributed about 2.85% of the total mineral production in the country	
Amravati	China clay, fireclay		
Bhandara	China Clay, Chromite, Kyanite, Manganese, Corundum, pyrophyllite, sillimanite, quartz, Silica sand, Quartzite, copper, gold, granite, marble, silver, vanadium, steatite		
Chandrapur	China Clay, Chromite, Coal, Dolomite, fireclay, Fluorite & Shale, Iron ore (H), Limestone, Corundum, pyrophyllite, sillimanite, byrtes, copper, granite		
Dhule	Limestone, Granite		
Gadchiroli	Iron ore (H), Limestone, Quartz, Silica sand, Quartzite, byrtes, Copper, granite		
Gondia	Iron ore (M), quartz, Silica sand, Quartzite, titanium		
Kolhapur	Bauxite, Laterite, quartz, Silica sand		
Nagpur	China Clay, Chromite, Coal, Dolomite, fireclay, Kyanite, Manganese, quartz, Silica sand, Quartzite, copper, gold, granite, lead-zinc, Marble, Ochre, tungsten		
Nanded	Limestone, granite		
Nashik	granite		
Raigad	Bauxite		
Ratnagiri	Bauxite, fireclay, quartz, Silica sand, steatite, titanium		More Information
Sangli	Limestone		RTI Link
Satara	Bauxite	State Human Rights Commission:	
Sindhudurg	Bauxite, China Clay, Chromite, Iron ore (H), quartz, Silica sand, Felspar, granite, graphite, steatite	Public Consultation	
Thane	Bauxite, China Clay, granite	Environment Clearance	
Yavatmal	Coal, Dolomite, Limestone
